Parent-Child Social Skills Training

CLaSS is a 10-week parent-child social skills training program for children ages 6 to 14 years. It is intended for children who struggle communicating effectively with others, understanding social cues, and making and keeping friends. The Parent sessions focus on ways to help your child achieve positive interaction skills, as well as a Parent Tool Box provided in each session focusing on strategies for effectively parenting a child with social communication and processing difficulties.
